

Create and submit a laboratory notification through Hinekōrako (for all laboratory users)

This Quick Reference Guide (QRG) takes you through the steps to submit a notification that a drinking water test sample has indicated an exceedance of a Maximum Acceptable Value (MAV).

It also covers how you can complete and submit a notification that was left in a draft state, which may occur if:

- at any point in the process of creating or editing a notification you leave the screen; or
- you are timed out of Hinekōrako due to 30 minutes of inactivity.

Options

Once you are logged in to the Hinekōrako online portal, from the **Notifications** screen you have two options:

- To begin working on a new notification, click the **Create** button. Go to **Step 1**.
- To find a draft notification that had been started but not completed, click on the **Submitted Lab Notifications** link, and then choose **Draft Lab Notifications**. The list of notifications will change to show those in a draft state. To manage a draft notification, go to **Step 12**.

Create a new notification

Step	What to do
1	Clicking on Create opens the first of several screens in the process of submitting a notification. Click on the Next button.

Non-Compliant Laboratory Results Notification

Under clause 72(2) of the Water Services Act, accredited laboratories are required to notify Taumata Arowai immediately of any result that does not comply with the NZ Drinking Water Standards. Water suppliers must continue to comply with the existing NZ Drinking Water Standards and Compliance Rules (The Drinking-water Standards for New Zealand 2005 (Revised 2018)) - until the new NZ Drinking Water Standards and Compliance Rules are in place. Non-compliance with standards or rules has the potential to have very serious impacts on drinking water consumers and for that reason urgent action to notify Taumata Arowai is essential. Once your notification has been submitted a copy of this will be provided to the Public Health Unit(s) associated with the drinking water supply and we may provide it to other agencies or authorities if action is required to protect public health.

Step	What to do
2	<p>On the next screen you can provide information about the sample that was tested, including:</p> <ul style="list-style-type: none"> The name and organisation of the person who submitted the test sample. The drinking water supply and the location within the supply where the test sample was taken. <p>To look up the supply from the public register of supplies:</p> <ol style="list-style-type: none"> Click on the magnifying glass. In the resulting pop-up screen of supplies, enter all or part of the supply's name in the search box and click <Enter> or click on the magnifying glass. If there are more than 10 supplies that meet the search criteria scroll through the pages to find your supply by using the left or right arrows or the results page number. Once you've found the supply click the checkbox to select it. Click Select. <p>If you do not know, or cannot find, the supply, leave the Drinking Water Supply field empty and proceed to Step 3.</p>

Step	What to do
3	<p>It's important that we have information about what part of the supply the water sample was taken from in case we need to discuss the issue with the supplier and also for longer term analysis of supplies.</p> <p>To specify the sample location:</p> <ol style="list-style-type: none"> 1. Indicate whether the sample was taken from a Treatment Plant or Distribution Zone within the supply or, if you do not know or it was another location, choose Other. NOTE: We do <u>not</u> need to be notified of MAV exceedances found in source water, only in treated water. 2. Click on the magnifying glass. 3. Select the Plant or Zone from the resulting list. NOTE: If you selected a supply in Step 2, the list will be of Plants or Zones for that supply. If you did not select a supply, the list will be of all Plants and Zones. 4. Click Select. 5. If you have selected Other, please provide as much information as you can in the Description of Location field.

Sample Location

Sample Location *

It's important that we know from where within the supply the sample is taken. Please identify which Treatment Plant or Distribution Zone within the supply the sample was taken from, or if that information is not available select **Other** and provide what information you have. Source is not a location option as you do not need to advise us of MAV exceedances in source water, only treated water.

Submit

Step	What to do
10	<p>Once you have completed all the information on this screen and uploaded the test results documentation, click <i>Submit</i>.</p> <p>If there is any problem with the data you have submitted, one or more error messages will be displayed at the top of the screen.</p> <p>If this happens, correct the errors, and click <i>Submit</i> again.</p>

Step	What to do
11	If there are no problems with the data, you will be returned to the <i>Notifications</i> screen with the notification included in the list of <i>Submitted Lab Notifications</i> .

The screenshot shows a table titled "Submitted Lab Notifications" with a search bar and a "Create" button. The table has the following columns: Notification ID, Supply ID, Supply Name, Sample Location, Submitted On, Submitted By, and Status. A single row is visible with the following data: NOT-10000155, BIA001, Biarritz, Other, 07/10/2021 12:10, Ziggy Stardust, Submitted.

Notification ID	Supply ID	Supply Name	Sample Location	Submitted On	Submitted By	Status
NOT-10000155	BIA001	Biarritz	Other	07/10/2021 12:10	Ziggy Stardust	Submitted

Log in again if you have timed out

Step	What to do
12	<p>For your security, Hinekōrako will time out after 30 minutes of inactivity.</p> <p>If you return to a Hinekōrako screen after it has timed out, you will be redirected to RealMe® to log in again. If you are in the middle of completing the notification form, if you attempt to keep working on that form you may receive error messages relating to permissions and other system related issues.</p> <p>If you experience these errors, click on any top menu option, and then log in again via RealMe®. Unfortunately, although the notification will be saved as a draft (<i>see the next section</i>), Hinekōrako will not have saved any changes you made on the page. You should therefore be prepared to complete the notification without taking any breaks of 30 minutes or more. For example, have all the information you need ready and any documents you need to upload ready to be uploaded.</p>

Manage a draft notification

Step	What to do
13	<p>If at any point in the process of creating or editing a notification you leave the screen in the notification process you have been working on, or if you are timed out of Hinekōrako due to 30 minutes of inactivity, the notification will have been saved as a draft.</p> <p>It is also possible to complete and submit a draft notification from another Laboratory User within the Organisation.</p> <p>You can manage those notifications by:</p> <ol style="list-style-type: none"> 1. Clicking on the <i>Draft Lab Notification</i> link above the list of notifications. 2. Identifying the notification you want to work with and then clicking <i>Edit</i> to complete and then submit it.

Nau mai

Welcome to Hinekōrako

Hinekōrako is the self-service web portal for drinking water suppliers and laboratories, and the regulatory and intelligence platform for Taumata Arowai. It will be the primary channel for registration and management of drinking water supplies – allowing suppliers and laboratories to share information with Taumata Arowai.

Laboratories share information by notifying Taumata Arowai when the test of a drinking water supply sample indicates that Minimum Acceptable Values have been exceeded. The notifications submitted by your laboratory will be listed below. From here you will be able to locate and view a past notification or create a new one.

Taumata Arowai will commence as the regulator on 15 November. Until then you should continue to notify the relevant Public Health Unit.
