

Manage laboratory portal users

(for Laboratory Administrators)

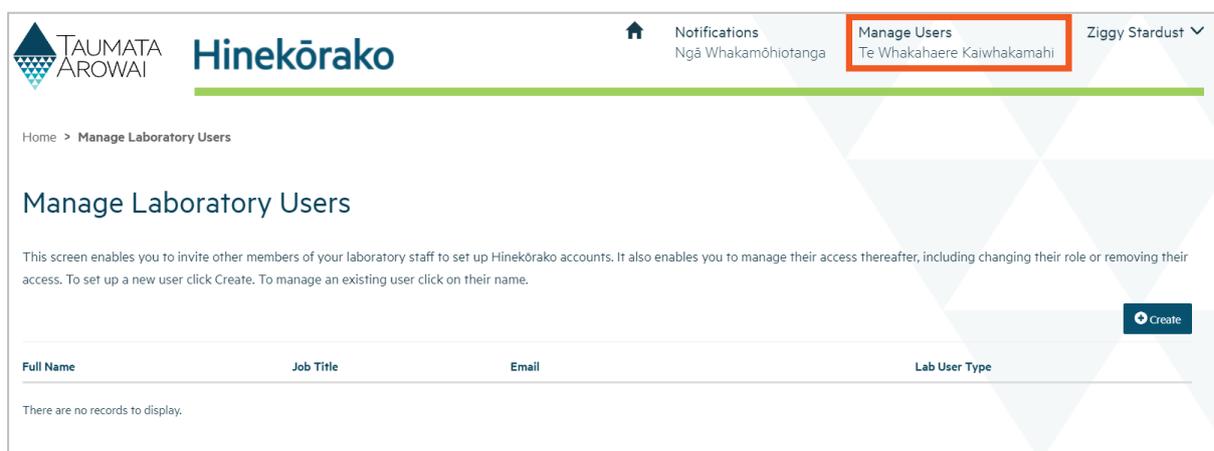

This quick reference guide takes you through the steps to:

- Provide others from your laboratory with access to Hinekōrako so they can submit notifications of drinking water supply tests that indicate an exceedance of the Maximum Acceptable Values (MAV).
- Manage those users once they are set up, including changing their level of access or removing access.

There are two levels of access:

- **Laboratory Users**, who can view past notifications of MAV exceedance submitted by the laboratory and can create and submit new ones.
- **Laboratory Administrators**, who can do what *Laboratory Users* can do, but who are also able to access the Manage User functionality described in this guide.

Step	What to do
1	Once you are logged in to the portal, click on the <i>Manage Users</i> link at the top of the page. If you cannot see that link it means you are not a <i>Laboratory Administrator</i> and thus cannot manage users.

The screenshot shows the Hinekōrako portal interface. At the top, there is a navigation bar with a home icon, 'Notifications Ngā Whakamōhiotanga', 'Manage Users Te Whakahaere Kaiwhakamahi' (highlighted with a red box), and a user profile 'Ziggy Stardust'. Below the navigation bar, the breadcrumb 'Home > Manage Laboratory Users' is visible. The main heading is 'Manage Laboratory Users'. A descriptive paragraph states: 'This screen enables you to invite other members of your laboratory staff to set up Hinekōrako accounts. It also enables you to manage their access thereafter, including changing their role or removing their access. To set up a new user click Create. To manage an existing user click on their name.' A 'Create' button is located on the right side. Below this is a table with headers: 'Full Name', 'Job Title', 'Email', and 'Lab User Type'. The table content is empty, with the text 'There are no records to display.'

Options

The *Manage Users* screen displays a list of Hinekōrako users from your laboratory.

From here you can do one of three things:

1. Set up a new user by clicking on the *Create* button. Go to **Step 2**.
2. Manage an existing user by choosing *Edit User* from the drop down list at the end of their row. Go to **Step 5**.
3. Remove a user by choosing *Deactivate User* from the drop down list at the end of their row. Go to **Step 7**.

Manage Laboratory Users

This screen enables you to invite other members of your laboratory staff to set up Hinekōrako accounts. It also enables you to manage their access thereafter, including changing their role or removing their access. To set up a new user click Create. To manage an existing user click on their name.

Create Laboratory User

Submission completed successfully

Manage an existing user

Step	What to do
5	<p>Choosing <i>Edit User</i> for a particular user opens a screen where you can view and update their details, with the exception of their email address. For security purposes only they can change that by updating their profile. For instructions on how they can do that, look in the Manage laboratory portal users (for Laboratory Administrators) quick reference guide on the Taumata Arowai website.</p> <p>You can change their role, either giving them or taking from them the ability to manage users.</p> <p>When you have finished you click on <i>Submit</i>.</p>

Step	What to do
6	<p>Unless there is a problem with your data you'll see the screen with the <i>Submission Completed Successfully</i> message.</p>

Resending a User Invitation

Step	What to do
1	<p>Navigate to Manage Users tab on the Portal and select the down arrow at the end of the relevant user in the table</p> <p>Select 'Resend Invite' from the menu options</p>

Manage Laboratory Users

This screen enables you to invite other members of your laboratory staff to set up Hinekōrako accounts. It also enables you to manage their access thereafter, including changing their role or removing their access.

To set up a new user click Create. To deactivate a user's account or change their role or details open the drop down menu at the end of their row.

Remove a user

Step	What to do
7	<p>Choosing <i>Deactivate User</i> for a particular user removes them from the list of active users and prevents them logging in.</p> <p>Note: There is currently no warning message, so be sure you have the correct user and wish to proceed before choosing that option. If you wish to reactivate the user you must contact Taumata Arowai.</p> <p>When you select <i>Deactivate User</i>, a message is displayed at the top of the screen confirming the user has been deactivated.</p>

Manage Laboratory Users

The record has been deactivated. ×

This screen enables you to invite other members of your laboratory staff to set up Hinekōrako accounts. It also enables you to manage their access thereafter, including changing their role or removing their access. To set up a new user click Create. To manage an existing user click on their name.
